

Date:

Wednesday Challenge Form

Group Members: Nicolas, Alex, Zachary

Problem Statement: Students are to create a fidget toy that follows the last Wednesday Challenge's regulations.

Approach: Our design was a cube with one side transparent and colorful, soft balls inside. To use the fidget toy, you simply shake it and watch the balls bounce around inside their little prison. It's captivating to watch, engaging, and interactive.

Solution: The winner of the challenge has not yet been decided. I felt like my group designed an interesting fidget toy and presented it well.

Lessons Learned: My group and I should've brainstormed more ideas on how to solve this challenge.
