## Wednesday Challenge Form

Group Members: Half The Class and Me

**Problem Statement:** Teams were to form a circle and pass tubes from one individual to the next: 1) while sitting; 2) while standing; 3) in alternating fashion.

**Approach:** For the first two phases, the tubes were passed in a clockwise fashion from the hands of one individual to the hands of the individual next to him/her. For the last phase, people standing next to each other faced in opposite directions and passed the tubes to the closest same-facing person. When we couldn't complete one of the phases, we practiced it until we got it right.

**Solution:** The other team won the challenge. Our coordination was off. We should've focused more.

**Lessons Learned:** It's important to communicate as a team.
